

Not the first time
someone in music
bragged
about a great
package.

For more than 50 years, GHS has been an innovator in string design. Our strings have long been preferred for playability, superior tone and extremely high break points. And now we've designed a way to keep our strings as fresh and long-lasting when you play them as they were the day we made them. Tear-resistant GHS Nitro-Packs seal each string in nitrogen—no oxygen. If you ever open one and find corrosion, we'll replace it for free.* That's one package worth bragging about.

PLAY WITH THE BEST

*Within two years from printed date of manufacture on the Nitro-Pack label.
