

BOOMERS

STRENGTH AND DURABILITY TO THE CORE

Known worldwide for a high break point, power and sustain since 1972, GHS is proud to unleash its newest additions to the Boomers line-up!

THIN CORE BOOMERS

For the player that wants lightning fast action, faster speed runs, more precise arpeggios, and more musical bends.

THICK CORE BOOMERS

For players that down tune, or that want MORE. More sustain, more tone, more focused low end, and more inspiration.

We protect each and every individual string within its own Nitro-Pack by utilizing a sealed nitrogen atmosphere, preventing oxidation or corrosion. Then we seal the Nitro-Packs within our outer, air-tight, Fresh Pack foil. Your strings are delivered with our Nitro-Pack guarantee: if the strings inside our packaging are ever oxidized or corroded, GHS will replace them free of charge.
